Why Exhibit

• More than 60 countries likely to participate
• Exhibition Area spread over 40,000 sqm.
• Sector Specific Halls
• Participation of buyers form India and Overseas
• Participation of Senior Industry Leaders and Policy Makers

“Services are the global frontier of global trade. The Services Sector accounts for more than half of the total global employment growth. A recent study has estimated an additional gain of US$39 trillion in global GDP over 25 yrs, if border barriers are removed for trade in Services. Removal of restriction on temporary movement of professionals and easing labour mobility could constitute major step towards facilitation of international trade in Services leading to global growth, employment and prosperity. Let us move towards trade facilitation measures for services.”

“The importance of the Service Sector can be judged from the growth witnessed in World Trade in commercial services which has come in to focus in the way of multilateral trade negotiations under the General Agreement on Trade in Services (GATS). Services trade has also come into prominence in a number of regional trading agreements due to expansion of services and emergence of new services driven by income - related demand shifts, developments in information and communication technologies and the greater market access resulting from the widespread deregulation of public utilities. Easing labour mobility could boost world GDP in the range of 50-150% as some studies point out.”

**B2B Meetings**
The Confederation of Indian Industry (CII) works to create and sustain an environment conducive to the development of India, partnering industry, Government, and civil society, through advisory and consultative processes.

CII is a non-government, not-for-profit, industry-led and industry-managed organization, playing a proactive role in India’s development process. Founded in 1895, India’s premier business association has around 8000 members, from the private as well as public sectors, including SMEs and MNCs, and an indirect membership of over 200,000 enterprises from around 240 national and regional sectoral industry bodies.

CII charts change by working closely with Government on policy issues, interfacing with thought leaders, and enhancing efficiency, competitiveness and business opportunities for industry through a range of specialized services and strategic global linkages. It also provides a platform for consensus-building and networking on key issues.

Extending its agenda beyond business, CII assists industry to identify and execute corporate citizenship programmes. Partnerships with civil society organizations carry forward corporate initiatives for integrated and inclusive development across diverse domains including affirmative action, healthcare, education, livelihood, diversity management, skill development, empowerment of women, and water, to name a few.

In its 120th year of service to the nation, the CII theme of Build India - Invest in Development: A Shared Responsibility, reiterates Industry’s role and responsibility as a partner in national development. The focus is on four key enablers: Facilitating Growth and Competitiveness, Promoting Infrastructure Investments, Developing Human Capital, and Encouraging Social Development.

With 66 offices, including 9 Centres of Excellence, in India, and 8 overseas offices in Australia, Bahrain, China, Egypt, France, Singapore, UK, and USA, as well as institutional partnerships with 312 counterpart organizations in 106 countries, CII serves as a reference point for Indian industry and the international business community.
