2.20.4 The second cover, i.e. price bids of only technically acceptable offers shall be opened and evaluated. All Tenderers whose technical proposals have been found acceptable will be informed about the time and date the opening of the Price Bids.

Wherever necessary, the Purchaser will convey its observation on such ‘minor’ issues to the tenderer either online or by registered/speed post etc. asking the tenderer to respond by a specified date. If the tenderer does not reply by the specified date or gives evasive reply without clarifying the point at issue in clear terms, that tender will be liable to be ignored.

2.24 Discrepancy in Prices
2.24.1 If, in the price structure quoted by a tenderer, there is discrepancy between the unit price and the total price (which is obtained by multiplying the unit price by the quantity), the unit price shall prevail and the total price corrected accordingly, unless the Purchaser feels that the tenderer has made a mistake in placing the decimal point in the unit price, in which case the total price as quoted shall prevail over the unit price and the unit price corrected accordingly.

2.24.2 If there is an error in a total price, which has been worked out through addition and/or subtraction of subtotals, the subtotals shall prevail and the total corrected; and

2.24.3 If there is a discrepancy between the amount expressed in words and figures, the amount in words shall prevail, subject to sub clause 2.24.1 and 2.24.2 above.

2.24.4 If, as per the judgement of the Purchaser, there is any such arithmetical discrepancy in a tender, the same will be suitably conveyed to the tenderer by registered / speed post. If the tenderer does not agree to the observation of the Purchaser, the tender is liable to be ignored.

2.25 Scrutiny & Evaluation of Tender Technical Bids
2.25.1 Tenders of the Tenderers, who do not meet the required qualification criteria prescribed in Section VII, will be treated as non-responsive and will not be considered further.

Technical bids of the Tenderers, who fulfill qualification criteria laid down in Section-VII, shall be evaluated first in terms of requirements/specifications given in Section- IV & V of the tender document. If the details/data given in the technical bids are found in conformity with the technical specification prescribed in Section V, testing of the models offered by the Tenderers may be carried out, only wherever found necessary, by the Tender Evaluation Committee to ascertain the actual performance of the equipment/ instrument. Tenderer, will arrange, at his cost, the demonstration of the equipment/ instruments.

The cost of travel, stay, boarding etc. of the members of TEC, if any, for witnessing the performance will be borne by the Purchaser.

2.30.1 After determining at the technical evaluation stage that the equipment/ instruments offered are in conformity with the requirement and the offer of the Tenderer is found technically suitable; price bids of the Tenderers, whose technical bids are accepted, shall only be opened.
2.30.2 The lowest tenderer (L1) shall be determined on the basis of net cash outflow from the Purchaser in the first Seven years after commissioning and acceptance of the goods. Future cash flows for this purpose shall be converted into “net present values” by using the discounted cash flow procedure @ 9% per annum. The net cash outflow will be as under:

Net cash outflow = \( (P) + (M) \);

The software should include a database of retention indices and physical properties for more than 400 hydrocarbons boiling within the gasoline range (IBP-220°C). The individual component data to be processed to provide reports of sample composition summarized by carbon number and compound group types viz., paraffins, iso-paraffins, naphthalenes, olefins, and aromatics plus oxygenates (PIONA analysis). The software must be provided with the following features:
   a) Quick database creation
   b) Unknown tab lists unidentified peaks in order of concentration
   c) Complete control of all GC parameters from PC.
   d) Capacity for at least 400 or more peaks/analysis.
   e) Unknown indexer takes the user directly to the unknown peak for manual identification
   f) Unique dashboard feature continuously presents the user with all calculated results; results are instantly recalculated when changes are made
   g) Hydrocarbon group-type filtering. Full preview/printing of reports.
   h) It should have ability to identify the different gaseous components from the comparison of retention index / RRT databank.
   i) Results to be ‘bound’ with the chromatographic data for instant retrieval/archiving
   j) Results files themselves work as fully functional reference databases, Full reports to be stored with results for easy retrieval without processing
   k) Support for Automated Post-acquisition reporting. Formula creation for expanded reporting
   l) Post-run application links to extend functionality Chemical and Physical Property Calculations to be provided.
   m) Vapour Pressure, Oxygenate content, Relative Density, Average Molecular weight
   n) Wt%, Vol%, Mole%, of Types by Carbon Number, Wt%, Vol%, Mole% of Individual Components
   o) Application software to be compatible with Windows 7 or better.

p) The hardware should have following minimum configuration:
   - PC should be of reputed brand like Dell, HP.
   - Intel core i7 processor.
   - 16 GB DDR4 /1TB HDD
   - Integrated network adapter for GC interface
   - DVD high speed hyper drive
   - LED 21.0” minimum, colour monitor.
   - USB ports 6 min, with at least two in front.
   - Optical mouse / Multimedia key board
   - LaserJet colour printer.

ii) Column Evaluation Standard
iii) PIONA Mixture Standard
iv) N-paraffin standard C14 to C20
v) CRMs should be prepared with minimum 12 months stability.

9. Auto Sampler Liquid (ALS) : Sample capacity 08 vials or more

10. Consumables required for installation & smooth operation of analyser for at least 5 years to be quoted.

   i) Complete consumables required for installation and commissioning of the analyzer should be quoted. The user shall provide only carrier gases, power and installation space.

   ii) Installation kit should at least contain the following items –
       • Gas Filters for Carrier, Hydrogen, Air & Auxiliary Gases and Moisture traps.
       • Electronic Gas Flow Meter.
       • Hand tools – spanner, adjustable wrench, allen key, screwdriver, specialized wrench, if any, etc.
       • Vespel Ferrules, Ferrules, Back nuts, Nuts, Tee Unions Swagelok & Reducing Union Swagelok of required size.
       • Micro syringes (1µl & 5 µl).

   iii) Any other items required for complete installation and commissioning of the system.

   iv) Consumables for trouble free operation for 1000 tests approx. (per year)

   v) Vendor has to provide branded online UPS of minimum 5 KVA rating with isolation transformer and 3 hours of back-up facility. Make and model should be specified.
